# 1 Problems

This approach helps a lot since equality cases can be easily obtained. The left side's equality case is  $r = 1$ . The right side's equality case occur when  $y = rx$  passes through the interior of exactly  $n$  squares. Such cases occur when  $r$  is either an integer, reciprocal of an integer,  $r \geq n$  or  $0 < r \leq 1/n$ . ■

## 2. Determine all functions $f : \mathbb{R} \rightarrow \mathbb{R}$ such that

$$f(xy + f(x)) = f(x)f(y) + x, \quad \forall x, y \in \mathbb{R}.$$

Small bump after stye. Small stye on bottom waterline. Small lump left after stye.
